

Water Quality Levels and Applications

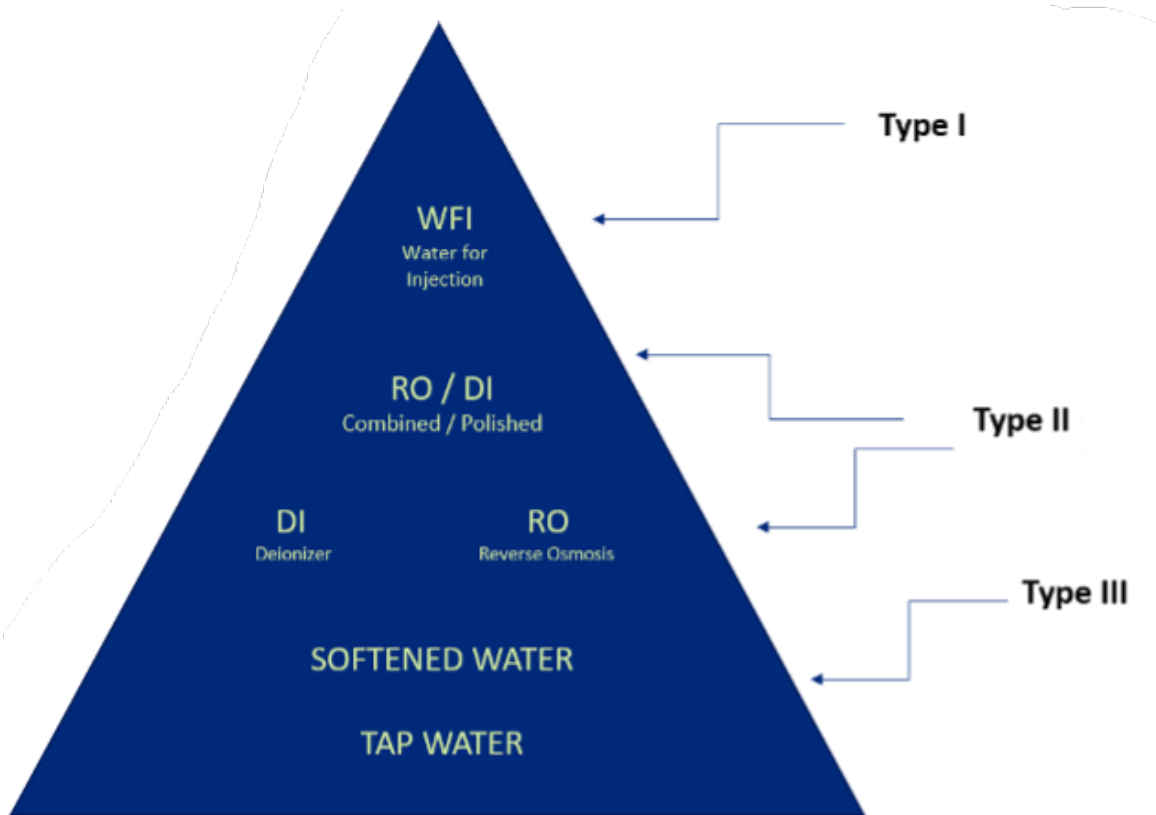

Water Quality Levels and Applications

Water quality ranges from tap water to water for injection. Lockwood Products specializes in bringing tap water quality up to ASTM Type II standards through the process of reverse osmosis, or reverse osmosis plus a polisher deionization system. In addition, a full line of softeners, filters, and accessories for pre and post treatment are available.

Visit lockwoodproducts.com for a complete list of products and applications.

Applications for Reverse Osmosis and/or Deionized Water:

- | | | | |
|---------------|----------------------|----------------------------|---------------------|
| Laboratories | Car Wash | Mixing Chemical | Washers/Sterilizers |
| Breweries | Humidification | Spot Free Rinse | Food Processing |
| Bottled Water | Plating Initial Fill | Optical Lens Manufacturing | And many more... |
